PROFESSIONAL SUMMARY

Python full stack developer with hands-on experience in Django, Django REST Framework, FastAPI and React, building production REST APIs, booking and payment workflows and responsive web interfaces, plus AI-integrated applications (LLM chatbot, Gemini assistant). BCA graduate with a full-stack internship in React and Django.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Frontend: React, Redux, Tailwind CSS, JavaScript
Backend & Frameworks: Django, Django REST Framework (DRF), FastAPI, SQLAlchemy, Pydantic, REST API Development, JWT Authentication
Databases: PostgreSQL, Alembic and Django migrations (schema migrations)
AI & Integrations: Google Gemini API, LLM Chatbot Integration, Payment and Booking Workflows
Backend Concepts: Multi-Tenant Architecture, Background Jobs (APScheduler)
Testing & DevOps: Pytest, Docker, Git, GitHub

PROFESSIONAL EXPERIENCE

Python Backend Developer, MITE Technology **Nov 2025 – Present**

- Develop and maintain production REST APIs for an event and movie ticketing platform using Python, FastAPI, SQLAlchemy and PostgreSQL.
- Built booking features including seat inventory APIs, offer, coupon and add-on validation, and payment status flows.
- Introduced APScheduler batch jobs to release abandoned seat locks, revert seats and tickets for failed bookings, and update expired booking and payment statuses.
- Implemented Firebase push notifications and a QR scanner flow supporting static and dynamic QR codes and manual ticket consumption.
- Implemented an email-provider fallback to improve the reliability of booking confirmation emails.
- Write and troubleshoot Alembic migrations for multi-tenant PostgreSQL schemas; debug production issues and optimize database queries.
- Write Pytest unit and API tests and review backend code as a developer reviewer through Git and GitHub.

Python Full Stack Development Intern, BridgeOn **Apr 2025 – Oct 2025**

- Built full-stack web application features using React on the frontend and Python/Django on the backend.

SELECTED PROJECTS

Food Rush – E-commerce Web App
Tech: *React, Redux, Tailwind CSS, Django REST Framework, PostgreSQL*

- Built authentication, product management, payment and order processing APIs with Django REST Framework and PostgreSQL.
- Developed a responsive React and Redux front end with Tailwind CSS, integrated with the DRF backend.

SmartDine – AI-Powered Contactless Restaurant System
Tech: *Django, Django REST Framework, PostgreSQL, JWT, Google Gemini API*

- Built a REST backend with role-based JWT authentication for Admin, Kitchen, Waiter and Customer workflows.
- Implemented table-specific QR ordering with a custom dish builder that calculates price and prep time dynamically.
- Built an order lifecycle (Pending → Preparing → Ready → Served) with wait-time estimation and waiter dispatch.
- Integrated a Gemini-powered assistant for menu recommendations; added inventory low-stock alerts and PDF sales reports.

Tickets2Me – Event and Movie Ticketing Platform
Tech: *FastAPI, SQLAlchemy, Alembic, PostgreSQL, Pydantic, APScheduler, Firebase, Pytest*

- Designed a multi-tenant backend with separate PostgreSQL schemas per region (India and UAE), managed through Alembic migrations.
- Implemented booking cancellation and refund rollback with Pydantic request validation, plus QR-enabled confirmation emails and receipts.
- Built QR scanning for static and dynamic QR codes with manual consumption, and Firebase push notifications.
- Wrote SQL and JSONB queries for role-based revenue reporting across tenant schemas; added an LLM-powered chatbot.

EDUCATION

Bachelor of Computer Applications (BCA), University of Calicut **2022 – 2025**
